

# STANDARD RUBBER RIBBED

## PV BELTS

**PV standard rubber ribbed belts** are made of polybutadiene compound and produced in PH, PJ, PK, PL and PM profiles.

### PV BELTS DESIGN:

- Eliminates belt matching
- Permits drive design to meet exact power or space requirements
- Distributes the drive load across the entire belt width
- Permits cooler running and high drive efficiency
- Excels on small pulleys at high speeds

PV ribbed belts are also available in elastic version (TEM) and they are suitable in the transmission where fixed centre distance is required. The TEM belt is developed according to the customer requirements.

### STANDARD RANGE:

## MULTI-RIB BELTS

# STANDARD RUBBER RIBBED BELTS
